

**Instructions:**

1. Square 1 comes with an Iron plate magnetically attached to the base. Detach this Iron plate from the bottom of Square 1.
2. The iron plate features an adhesive strip bearing 3M branding on one side. Gently peel off the protective liner to reveal the sticky side of the tape.
3. Stick the iron plate onto the surface where Square 1 is intended to be magnetically attached. Press the iron plate firmly against the surface for 5 to 10 seconds to ensure proper adhesion.
4. Place the base of Square 1 near the iron plate, allowing them to snap together magnetically. The magnetic connection has sufficient strength to support the weight of power cords and USB-C cables connected to Square 1.
5. Connect your devices to Square 1's power sockets and USB-C ports. To reduce the risk of overloading, refrain from linking multiple Square 1 units together (no daisy chaining), and avoid attaching other multi-socket power extension devices to Square 1.

**Precaution:**

To detach the iron plate from its adhered surface, gently apply mild heat to loosen the adhesive. Once the adhesive has softened, the iron plate can be easily detached.

**WARNING:**

The USB outputs are suitable for use together with information technology and audio/video appliance. The appliance and the mains-socket must all times be easily accessible. The product installation height should not exceed 1 meter. Maximum length of USB-C cable connected to the device must be less than (<)3.0m.

**Product Parameter:**

**Rating:** 10A, 250V~, 50Hz, MAX 2500W.  
**USBC Shared Output:** 5.0V~3.0A (15.0W Shared MAX)  
**USBC Single output:** 5.0V~3.0A (15.0W) | 9.0V~3.0A (27.0W) | 12.0V~2.5A (30.0W) | 15.0V~2.0A (30.0W) | 20.0V~1.5A (30.0W)
